

MODULAR SAFETY CONNECTOR (MSC)

INTRODUCTION

Duelco Safety Controller-Modular Safety Connector (DSC-MSC) is a 5 poles connector that permits the interconnection between the DSC modules (DSC BUS).

Connection

1. Connect the same number of "MSC" 5-pole rear panel connectors as the number of units to be installed (except for the relays modules that don't need this connector).
2. Fix the train of connectors thus obtained to the DIN rail (hooking them at the top first). **THE FEMALE CONNECTOR MUST BE ON THE LEFT (FRONT VIEW).**
3. Fasten the units to the rail, arranging the contacts on the base of the unit on the respective connector.
4. Press the unit gently until you feel it snap into place.

TECHNICAL DATA

Connections	5 poles
Operating temperature	-10 ÷ 55°C
Storage temperature	-20 ÷ 85°C
Relative humidity	10% ÷ 95%
Dimensions (h x l x p)	36,5 x 29,2 x 20,5 mm
Weight	5,2 g
